

ABB Opens Repair Center

ABB Automation has opened the first of three factory-certified centers for industrial repair services. Beyond its existing factory repair facilities, ABB is consolidating its testing, repair and reconditioning centers into three strategic locations to better serve a worldwide customer base. The new centers will be located in North America, Europe and Asia, respectively.

With more than 18,000 square feet, the new facility in Columbus, Ohio, has twice the space of the previous repair center. For additional information, call (614) 261-2000, fax (614) 261-2172 or visit www.abb.com.

EPA Honors RevTech Technology

RevTech, Inc. was recently awarded the Environmental Protection Agency's (EPA) 2000 Presidential Green Chemistry Chal-

lenge Award in the small business category for its Envirogluv™ ink technology. The technology was cited by the EPA for its method of decorating glass containers that are aesthetically pleasing and durable, and can be obtained in a cost-effective, environment friendly and energy efficient manner.

Innovative Developing New Marking Ink

Innovative Ceramic Corp. is developing a new white marking ink for the ceramic industry, and manufacturers are welcome to contribute their marking requirements during the final stage of development. In exchange for their marking specifications, manufacturers will receive a sample to test in their production environment. Innovative will then evaluate and incorporate the test results in the final design.

According to the company, the current characteristics of the marking ink include

low viscosity and low surface tension. The ink is reportedly not a safety hazard and is easy to clean up. For additional information, call (330) 385-6515.

ICP Achieves ISO 9001 Certification

Industrial Ceramic Products, Inc. (ICP) has successfully completed all requirements to achieve ISO 9001 certification, according to EAGLE Registrations, Inc. The scope of registration includes Design, Develop and Manufacture Custom Ceramic Components for Industrial and Commercial Applications.

"This award represents our company's investment in time and money to ensure that our established customers and those we may be privileged to serve in the future receive the quality performance and service they deserve," said R.C. Oberst, president. "Our mission is to manufacture
