Storage Recommendations For Waterslide Decals

For best results, store in a climate control environment. Ideal conditions are 20°-23°C (68°-74°F), and 58-60% RH. Decals sheets will stick together if stored:

1. Flat without interleaf sheets
2. With motifs facing each other
3. In high humidity environment

Keep decal sheets clean by storing them in the shipping container on their long edge.
